

USE CANNABIS? TO BE BLUNT...

We're studying cannabis users and need your help Compensation is provided

Researchers at VA Puget Sound are conducting the ReCOUP study to learn if an investigational drug, prazosin, can help both those with and without PTSD in managing cannabis use.

ELIGIBILITY CRITERIA INCLUDES:

- Any gender, age 18-80
- Veterans and non-Veterans
- Diagnosis of PTSD (optional)
- Have problems related to current cannabis use
- No problematic use of drugs other than cannabis or tobacco in the past 6 months
- Good general health

PARTICIPATION INCLUDES:

- 12 visits over about 16 weeks with researchers at VA Puget Sound in Seattle. Visits may be virtual, telephone, in person or a combination.
- 3 months of taking prazosin
- Urine drug testing
- Questionnaires about cannabis use
- Questions about mental health symptoms
- Review of health and medications
