Clinical Component Update

Harold Kudler, M.D.

Maryland National Guard Summit for Healthcare Providers June 18, Ellicott City MD

At the meeting, the Maryland National Guard and the Maryland Department of Health and Mental Hygiene provided a unique opportunity for behavioral and primary care professionals to come

together and explore the multifaceted issues unique to returning Service Members, Veterans and their families. Dr. Harold Kudler, (MIRECC Associate Director, Clinical) was the invited key note speaker.

Prior to giving his talk, Dr. Kudler was presented the State of Maryland Meritorious Civilian Service Medal by James A. Adkins, Brigadier General, who serves as Adjutant General of the Maryland Army National Guard and Maryland Lt. Governor, Anthony Brown.

Dr. Kudler accepted this honor on behalf of the Mid-Atlantic MIRECC. The citation reads as follows:

For exceptionally meritorious service to the Service Members of the Maryland National Guard, their families and Veterans in your multiple roles providing leadership for the treatment of post traumatic stress disorder (PTSD). As the founding chair of the PTSD Practice Guideline Task Force of the International Society for Traumatic Stress Studies, Dr. Kudler was the first author of the Task Force's Treatment Guidelines for the psychodynamic treatment of PTSD. Dr. Kudler is also involved in establishing DoD/VA, State and Community Partnerships throughout the nation. Dr. Kudler's actions reflect great credit on himself, the U.S. Department of Veterans Affairs and the Maryland National Guard.

Outreach to Community Providers Issues of Women Returning from Combat

This series of nine full-day face-to-face workshops for community providers across all of North Carolina has just been completed. MIRECC Clinical staff Drs. Harold Kudler and Kristy Straits-Troster

Outreach to Community Providers

continued from page 1

served as faculty and planning committee members. The workshop was part of a collaboration with the our MIRECC's Clinical component, Citizen Soldiers Support Program, the Department of Defense (Camp LeJeune) and the Southeast Area Health Education Center. Each session started with a presentation of the Color Guard, to set the tone for the day.

The workshop presented issues of women in the military and transitioning to civilian life, including focus on military culture, issues unique to women, child development and family roles, gender-specific treatment, and the importance of multi-agency partnerships in serving Veterans and their families. The workshop featured video clips from the documentary "Lioness", obtained with permission from producers, the short documentary "Angie's Story", and personal stories from previously deployed women including a Navy Psychologist deployed with Marines (LCDR Erin Simmons) and a Social Worker (Liz Marks) deployed as a commissioned officer to Iraq. Current TRICARE information was presented by a leading TRICARE representative to encourage participants to become providers for military families through education. This is the 3rd topic of the "Painting a Moving Train" workshop series to be made available for free in a reduced 2-hour web-based format with CEUs as a "Treating the Invisible Wounds of War" online course (see below).

Treating the Invisible Wounds of War: Part 3 - Issues of Women Returning from Combat

Women military service members returning from deployment to the wars in Iraq and Afghanistan face gender-specific readjustment issues as they transition back to their local communities. This workshop will provide an overview of the health/mental health concerns of women veterans within the context of military culture, gender-specific roles, available support resources and effective treatments.
